

Headgear Fitting Tips for the Bravo™ Nasal Pillow System

After you put the headgear on your head and insert the nasal pillows into your nose,

1. First tighten the back straps of the headgear
2. Second tighten the top straps of the headgear

A properly worn headgear should:

- * Have the side and back straps very close to the ears
- * Have the back straps on the lower part of the head closer to the neck, not near the top of the head

For further information, please reference your Bravo instructions for use or call customer service at (866)-246-6990.
